Please be advised that the County of San Diego Department of Environmental Health Solid Waste Local Enforcement Agency received and accepted a registration application for continued operation of a chip and grind operation for Inland Pacific Resource Recovery. The LEA is certified by California Department of Resource Recycling and Recovery (CalRecycle) to enforce state laws and regulations at solid waste facilities and operations within the County of San Diego.

Description of Changes: Registration permits shall be reviewed at least once every five years from the date of issuance. As the result of a Permit Review, the operator submitted a registration application to continue an existing chipping and grinding operation for the processing of green materials. Operational documents were updated to identify the receipt of construction and

demolition wood waste, replacement equipment and frequency of waste removal. Green materials continue to be processed and removed from site within seven (7) days of receipt. No changes to site capacity, peak loading, facility size, operating area or traffic volume have occurred.

LEA Findings per §21665(c): The County of San Diego Solid Waste Local Enforcement Agency finds the changes consistent with State Minimum Standards; the changes do require submission of a registration application and issuance of a registration permit for the existing operation.

Where can a copy of the permit application can be reviewed?

A copy of the permit application is available for review by appointment at the Department of Environmental Health office located at 5500 Overland Ave, Suite 170, San Diego.
